Independence is the key for a better New South Wales

Coal Seam Gas Drilling
Rig, Darkes Forest,
Are dangerous chemicals
injected into surface?

Waratah Rivulet - Woronora Dam
showing mining impacted damage

Methane Coal Seam Gas exploration approved Darkes Forest on Sydney Catchment Authority land plus Methane Power Station Helensburgh. ABC Four Corners recently aired “The Gas Rush”, a gripping display of greed gone wrong by Labor for profit at the expense of human health, our food bowl and water supply . This is about to happen now unless Liberals give you a written absolute guarantee to stop this.

Waratah Rivulet, a tributary of Woronora Dam, was a pristine river until it was undermined by mining. A recent inspection of Waratah Rivulet revealed a critical watercourse where surface flow has not returned to a riverbed cracked by longwalling nearly six years ago. The Waratah Rivulet feeds the Woronora Dam and provides the Sutherland Shire & Northern Illawarra with their water supply. Mining caused this, Coal Seam Gas (mining) will cause more damage.

Legendary corruption fighter

Dedicated to community empowerment

Integrity and honesty in government

Does not trust either of the major parties

Open and transparent government reform
